5. Discussion Notes

Record key ideas, evidence, alternatives considered, concerns raised, and agreed reasoning.

Agenda item / topic	Discussion notes
5.1 Research direction	The team retained the original global electricity-consumption topic, proposal and research questions. The study compares countries, regions and end-use sectors over 1990-2022; the meeting did not introduce a new research topic.
5.2 Sources and preparation	Candidate energy sources, including IEA and UN statistics, were discussed. Kelden explained data access and licensing concerns requiring investigation. Collection/preprocessing should consider coverage, units, sector definitions and missing values before comparisons are made.
5.3 Development and division of work	Kelden leads data collection/preprocessing; UN CHI KIT leads technical development, analysis and outputs. HE YIFEI and TANG JING organise documentation and progress records, with Tang taking minutes. SHENG TIAN and GAN RUIYAN prepare presentation PPT materials. These are responsibilities, not claims of completed implementation.
5.4 Proposal, video and follow-up	The team discussed proposal content and introductory-video preparation, including division of work. Members will coordinate materials, maintain progress records, prepare Work Plan 02 for 10 November and review progress at the next online meeting on 11 November.
