SELF-DIRECTED PROJECT TEAM MEETING MINUTES

Complete, review, and circulate this record within 24 hours of each meeting.

1. Meeting Details

Item	Details
Project title	The Power-Hungry World: Comparing Global Electricity Consumption Across Sectors
Meeting no.	1
Date	Wednesday, 28 October 2026
Start / end time	20:00–21:00
Location / platform	In class, Building E4
Meeting chair / facilitator	Tang Jing (facilitator)
Minute taker	Tang Jing (Team Scribe)

2. Attendance

Team member	Present / absent / apology	Role or responsibility
UN CHI KIT (mc653081)	Present	Team coordinator and project tracker
KELDEN JAMTSHO (mc664183)	Present	Project analyst and quality reviewer
GAN RUIYAN (mc664801)	Present	Lead project developer
HE YIFEI (mc664916)	Present	Team reporter and team liaison
SHENG TIAN (mc664961)	Present	Second project developer
TANG JING (mc666256)	Present	Second project analyst and team scribe

3. Agenda

No.	Agenda item	Lead / presenter	Planned time
1	Opening, attendance and purpose of the first project meeting	Tang Jing	5 min
2	Review the three candidate topics and select the team topic	Jimmy / all members	15 min
3	Confirm the project title, global direction and preliminary research question	All members	10 min
4	Discuss team structure, roles and division of responsibilities	All members	15 min
5	Review the work plan, photo arrangements and submission milestones	Un Chi Kit / Tang Jing	10 min
6	Confirm decisions, action items and next steps	Tang Jing	5 min

4. Follow-up from Previous Meeting

Previous action or decision	Owner	Progress / evidence	Status	Further action required
Not applicable – this was the team's first project meeting.	N/A	No previous team meeting actions or minutes.	N/A	Proceed with initial topic selection and project planning.

5. Discussion Notes

Record of the main discussion, decisions and follow-up clarifications.

Agenda item / topic	Discussion notes
5.1 Topic selection	The team reviewed the three candidate topics prepared by the team pairs and discussed their relevance, data availability, analytical potential and feasibility within the semester-project schedule. The team selected Topic A: electricity consumption by sector. The topic provides a basis for comparing electricity-use patterns over time and across sectors, countries and regions.
5.2 Project title and global direction	The team agreed to pursue a global research direction and adopted the working title “The Power-Hungry World: Comparing Global Electricity Consumption Across Sectors.” The team noted that the geographic coverage of the evidence must match the global framing. A U.S.-only dataset may be useful as a case study or reference, but it cannot by itself support conclusions about global electricity consumption.
5.3 Preliminary research question and scope	The preliminary research question is: “How has electricity consumption changed across countries and regions over time, and how does consumption differ across sectors?” This wording is a starting point for the proposal. The final research question, country coverage, year range, sector classification and reporting unit were not fixed at this first meeting and will be confirmed after the candidate datasets and their definitions are examined.
5.4 Data sources, access and cross-source preparation	Post-meeting clarification from Kelden, recorded here for completeness during preparation of these minutes: the IEA dataset was obtained through the IEA portal, and its terms may restrict open redistribution. The team should check the applicable licence and should not upload or circulate the raw IEA file through GitHub or shared storage unless permission allows it. UN energy-balance data is another candidate source. Kelden indicated that datasets from the two sources may be combined after data cleaning. Before merging, the team will need to check and harmonise country names, years, sector definitions, units, missing values and coverage. The final source selection and merge rules remain open.
5.5 Validation and visualization direction	The team recognized the need to cross-check important findings against an additional reliable source or URL, rather than relying on one dataset alone. In subsequent group discussion, members expressed agreement in principle to use Dash and Plotly, alongside other course tools where useful. An interactive dashboard is a proposed way to present the results and demonstrate the application of course visualization skills. Its final layout, filters, indicators and chart types will depend on the confirmed data.
5.6 Team structure and responsibilities	The team discussed a practical allocation of the course-recommended roles for a six-member team: Un Chi Kit as team coordinator and project tracker; Kelden Jamtsho as project analyst and quality reviewer; Gan Ruiyan as lead project developer; He Yifei as team reporter and team liaison; Sheng Tian as second project developer; and Tang Jing as second project analyst and team scribe. All members remain responsible for contributing to decisions, completing assigned tasks, reporting blockers and reviewing the team's work.
5.7 Work plan and submission milestones	The team reviewed the work plan and agreed on a staged preparation schedule: research-question, data-context and dataset/technical drafts by Monday, 2 November; proposal integration and introductory-video/presentation preparation by Tuesday, 3 November; and internal review and correction by Wednesday, 4 November. The formal Moodle deadline for the team project proposal, first meeting minutes and introductory video is Thursday, 5 November 2026, at 11:00 p.m. Each member must complete the required individual Moodle submission where the submission link instructs this.

6. Decisions Made

No.	Decision	Reason / supporting evidence	Decision owner	Date agreed
1	Select Topic A: electricity consumption by sector.	The topic supports time-based and sector-based comparisons and offers suitable opportunities for statistical analysis and visualization.	All six members	28 Oct 2026
2	Adopt the global research direction and the working title “The Power-Hungry World: Comparing Global Electricity Consumption Across Sectors.”	The team preferred a global comparison; the selected evidence must therefore have suitable global coverage.	All six members	28 Oct 2026
3	Use a preliminary research question and refine it after reviewing the datasets.	The first meeting established the topic and direction, but the detailed scope depends on data coverage and definitions.	All six members	28 Oct 2026
4	Adopt the proposed six-member role allocation recorded in Section 5.6.	The allocation combines the instructor's recommended roles while retaining shared responsibility for major decisions.	All six members	28 Oct 2026
5	Leave final datasets, year range, sector grouping and reporting unit open for verification.	These choices must be supported by source documentation and comparability checks.	All six members	28 Oct 2026
6	Use 2, 3 and 4 November for drafting, integration and internal review before the 5 November deadline.	The staged schedule allows time for coordination and final checking.	All six members	28 Oct 2026

7. Action Items and Task Assignments

Each task has one accountable member and a target date.

No.	Task / deliverable	Assigned to	Due date	Priority	Status / notes
1	Share candidate global dataset links and summarize coverage, years, sector definitions, units and access/licence conditions.	Kelden Jamtsho	2 Nov	High	Dataset choice and details to be confirmed.
2	Prepare the research-question/data-context draft and initial references, using the confirmed source information.	He Yifei	2 Nov	High	Coordinate with Kelden; integrate into proposal narrative.
3	Outline the data-cleaning and technical workflow, including country matching and cross-source preparation.	Gan Ruiyan	2 Nov	High	Coordinate with Kelden on source suitability.
4	Prepare initial visualization/dashboard ideas and identify suitable Dash/Plotly outputs.	Sheng Tian	2 Nov	High	Finalize after data structure is known.
5	Integrate the proposal narrative and lead preparation of the introductory video/presentation materials.	He Yifei	3 Nov	High	Coordinate contributions from all members.
6	Coordinate proposal compilation, track progress and arrange the team's internal review.	Un Chi Kit	3–4 Nov	High	Ensure all sections are ready for review.
7	Prepare/circulate meeting minutes and organize the team's shared records.	Tang Jing	4 Nov	High	Use the instructor's meeting-minutes template.
8	Review the proposal, minutes and video; check completeness, consistency and submission readiness.	All six members	4 Nov	High	Formal deadline: 5 Nov 2026, 11:00 p.m.

8. Risks, Issues, and Support Needed

Issue, risk, or blocker	Impact	Owner	Resolution / support required	Target date
IEA terms may restrict redistribution of the downloaded raw file.	Data-sharing and repository compliance.	Kelden / all members	Check the licence; share links/instructions rather than the raw file unless redistribution is permitted.	Before sharing
Candidate sources may differ in country coverage, years, sector definitions and units.	Merged data may be incomplete or misleading.	Kelden / Gan Ruiyan	Document definitions and harmonisation rules; preserve source identifiers and missingness.	Before analysis
Final dataset selection and independent validation source are not yet settled.	Research scope and conclusions may need revision.	Kelden / team	Compare candidate sources and identify a reliable external URL for cross-checking.	2–4 Nov
The proposed global scope may exceed the available time or data detail.	The team may not complete every optional analysis or dashboard feature.	All members	Prioritize the core research question and treat additional analyses/features as optional.	Next review

9. Matters for Next Meeting

Matter to resolve / next agenda item	Preparation required	Responsible member
Confirm the final data sources and access conditions.	Share source links, coverage, years, sector details and licence conditions.	Kelden Jamtsho
Finalize the research question and operational scope.	Compare data definitions and propose the supported year range, sector grouping and unit.	Kelden / all members
Agree on data cleaning and validation procedures.	Prepare a concise plan for matching, unit conversion, missing data and cross-checks.	Gan Ruiyan / Kelden
Refine the dashboard and visualization plan.	Suggest filters, indicators and chart types that can be supported by the data.	Sheng Tian / Gan Ruiyan
Review proposal, minutes and introductory video readiness.	Bring updated sections, references, slides/video status and unresolved issues.	All members; Un Chi Kit to coordinate

10. Next Meeting

Item	Details
Date and time	Wednesday, 4 November 2026, 21:00–21:45
Location / platform	In class, Building E6
Proposed chair / minute taker	Un Chi Kit / Tang Jing (subject to team confirmation)

11. Any Other Business (AOB)

Item / note	Follow-up or decision
IEA data access and sharing	Do not redistribute the raw IEA file unless the licence expressly permits it. Each member should follow the source's access requirements.
Communication and record keeping	Share meeting records, progress updates and blockers through the team group chat/shared team storage so that all members can follow the project.
Course submission	The proposal, first meeting minutes and introductory video are due on 5 November 2026 at 11:00 p.m. Follow the individual submission requirement stated on the relevant Class G Moodle links.

12. Review and Circulation

Item	Details
Minutes prepared by	Tang Jing (mc666256)
Prepared on	4 November 2026
Reviewed / approved by	To be reviewed by all six team members before submission.
Distribution / shared-storage location	Class G – Team 03 shared team folder / team group chat; final PDF to be submitted through the Class G Moodle submission link.

Record note: The meeting date, time, venue and full attendance reflect the updated Team Work Plan. Dataset selection, year range, sector grouping and reporting unit are intentionally left open because they require verification against the final source documentation. The IEA/UN and Dash/Plotly points above are explicitly identified as post-meeting clarifications or subsequent team discussion, not as decisions made on 28 October.
